The Shade 50 collection, comprising 14 different 'shades', is the result of research carried out in our in-house laboratories. Our aim was to create new hues to suit current colour and design trends. Made of frost resistant glazed porcelain stoneware, the tiles are 50x50 cm, rectified and suitable both for floor and wall tiling. The 14 basic colours are joined by SHADE CUT, seven different etched sizes available in the full range of colours, which remain true to the original Ceramica Vogue concept and which can enhance surfaces with beautiful decorative patterns. Five families of modular and combinable accessories in various materials and structures add the finishing touches to the product range: SHADE 10, rectified porcelain stoneware in 14 colours, size 10x50 cm; SHADE STICK, glazed extra-light retro 'float' crystal, with acid-etched decoration on the surface, size 10x50 cm; SHADE WOOD, wood-effect glazed porcelain stoneware listellos, size 10x50 cm; SHADE PROFILE, polished aluminium profiles, size 1x1x270 cm, which can be used as decoration or as trim or capping.
